PREFACE

This publication was developed in response to the many requests for information on beef cattle that have been received by the Science and Education Administration's Extension Staff of the U.S. Department of Agriculture and by the State Cooperative Extension Services.

It lists private organizations, State beef cattle organizations, land-grant universities, and State Extension Services in the United States that have publications, visual materials, or resource persons that may be consulted for information on beef cattle. The publications and visual materials available are listed as provided by the source organization, or a notation is made that no information was provided.

This reference is intended for use by colleges, universities, researchers, Extension personnel, 4-H adult leaders, and others who are interested in educational materials on beef cattle. It will be updated biennially. If you have additional listings, please send them to us.

DIXON D. HUBBARD
Program Leader, Animal Science

Reference to commercial firms, trade products, or company names is only for identification and does not imply endorsement by the U.S. Department of Agriculture. Inclusion of these references in this listing implies no approval of their products to the exclusion of others which may also be suitable, and the Department neither guarantees nor warrants the standards of the products.

The Science and Education Administration of the U.S. Department of Agriculture offers its programs to all eligible persons, regardless of race, color, sex, religion, age, handicap, or national origin, and is an Equal Opportunity Employer.

REGIONAL BEEF CATTLE HANDBOOKS

Regional Beef Cattle Handbooks have been developed for the Great Plains, South, and Northeast. These regional coordinated efforts are designed to pool technical resources in the development and publication of current educational materials and provide this information in fact sheet form to beef producers and allied industries, individuals, and organizations who interface with beef producers. Most Cooperative Extension Services in these regions distribute regional and State fact sheets to interested cooperators. Individual copies of fact sheets can usually be secured from county Extension offices.

A majority of the States in these regions have complete sets of regionally-developed fact sheets supplemented with other materials specific for their State available in handbook form. These handbooks are available at an average cost of approximately \$25.00. This price entitles the subscriber to a loose-leaf binder, all fact sheets to date, and any new or updated materials for a 3- to 5-year period. (This subscription period varies by State.) Regional fact sheets are available by region as follows:
